## EDUCATION

### Michigan State University Honors College – GPA: 3.9

Aug. 2024 – Dec. 2027

*Bachelor of Science in Computer Science, Minors in Data Science and Computational Math*

*East Lansing, MI*

Coursework: Data Structures & Algorithms, Object Oriented Programming, Info Management & the Cloud, AI Agents

## EXPERIENCE

### Data Science Platform Engineering Intern

May 2026 – Present

*Auto-Owners Insurance*

*Lansing, MI*

- Prototyped a Terraform IaC tooling stack for ML batch inference, provisioning **7+** cloud resources (SageMaker, ECR, S3) across two deployment platforms to validate a cloud agnostic, repeatable system deployment process
- Evaluated the new tooling against the team's existing CI/CD deployment pipeline and authored a **3 page** review recommending adoption, helping standardize the team's future infrastructure deployment process
- Extended the Terraform stack to provision and manage resources on OpenShift, using the OpenShift CLI and console alongside a Jenkins build pipeline to deploy, debug, and monitor workloads across both platforms

### Software Development Intern

Dec. 2025 – May 2026

*APS Data Technologies*

*Remote*

- Directed an AI coding agent through iterative, feature-by-feature development of an admin document dashboard, reviewing over **100+** features and fixes before integrating it into the team's production Next.js backend
- Implemented Google and Microsoft Entra OAuth authentication flows in the Django backend without third-party libraries, handling token verification enable secure login across multiple user roles in a live production environment

### Software Engineering Intern

May 2025 – Dec. 2025

*Alchemy Software LLC*

- Developed a reusable testing library and wrote over **20** test cases, reducing the effort required to create new test cases by **90%** and establishing a repeatable validation framework for ongoing feature development
- Debugged and resolved critical issues within new features, ensuring stability for monthly version launches

## PROJECTS

### Easy Text Transfer | *Electron, Node.js, TypeScript, JavaScript, React Native, Firebase*

Oct. 2025 – Dec. 2025

- Built a cross-platform text and note sync application across desktop and mobile clients using a polling-based architecture with last-write-wins conflict resolution to handle concurrent edits
- Implemented a shared state sync model where the most recently timestamped write takes precedence, eliminating conflict ambiguity without requiring a distributed consensus protocol

### GapWrap | *React, Vite, TypeScript, Python, Flask*

Jan. 2026 – Feb. 2026

- Engineered a crypto attack detector at SpartaHack 11 with a Python listener that flags bot-driven price manipulation, displayed using a frontend that visualizes transaction risk and mitigation options for users

## ORGANIZATIONS

### Imagine Software Consultancy | *Project Director*

Aug. 2024 – Present

- Led weekly check-ins with project leads across **7** concurrent client projects, identifying blockers early to maintain progress before semester checkpoints, resulting in all projects meeting MVP requirements
- Built several applications, including a React frontend for Ollama LLM interaction and a Chrome extension for RESTful API communication with Gemini, cultivating skills in modern web development and AI integration

### FRC Team 3604 Goon Squad | *Mechanical Lead*

Sep. 2021 – May 2024

- Designed and manufactured a game piece launch mechanism using CAD models in Fusion 360 on a Ford Motor Company sponsored team, iterating on designs across prototype revisions to increase scoring accuracy by **20%**
- Managed **5** groups of **15+** mechanical team members by communicating design decisions and priorities to accelerate development cycles, allowing team members to fail quick and respond with innovative solutions

## TECHNICAL SKILLS

**Languages & Tools:** Java, Python, JavaScript, TypeScript, HTML, CSS, React, React Native, Next.js, Node.js, SQL, C, C++, Firebase, AWS (SageMaker, S3, ECR, Lambda), Terraform, Jenkins, Kubernetes, NumPy, Pandas

**Developer Tools:** Git, GitHub, AWS Console, VS Code, Docker, Linux/Bash, MLFlow, Atlassian Suite, Ollama

**Soft Skills:** Communication, analytical thinking, time management, problem solving, troubleshooting, proactive learning
